Applying Goethean scientific methods to gain insights into  
Gaia & the processes common to rocks and water.

There will be:

- (1)** Field trips to 200 and 360-500 million years old rocks
- (2)** Water experiments and field trips to understand the flow  
patterns of water
- (3)** Study of Goethe's fairy tale, "The Green Snake and the  
Beautiful Lily"
- (4)** Examine man's interaction with water and earth, and  
fracking and reassessment of our relationship with Gaia for  
all time

Through 1<sup>st</sup> hand experiences, we will school our capacities  
for Imagination into the workings of Gaia by drawing,  
improving observational skills, through movement  
exercises, and conversation

We do not despoil what we have come to revere

OUR AIM IS TO ENHANCE OUR CONSCIOUSNESS OF  
THE EARTH
